

GREEN SUPPLY CHAIN MANAGEMENT POLICY (GSCM)

We at Mahindra Lifespaces are committed to establish industry benchmarks in Sustainable Development. We shall ensure that the project activities carried out and the products and services provided by us are Environment friendly and their impact on the Environment is minimal and contribute to continual improvement in our environmental performance.

To deliver on our commitment we shall focus on a philosophy 'REDUCE, REUSE, RECYCLE, RESTORE and REPLENISH' while working on the following key objectives:

- We shall encourage the Contractor, Supplier, Transporter and Service Provider to ensure total compliance to applicable legal and other requirements which have significant impact on Health, Safety & Environment.
- We shall give priority to the purchase of locally available materials to minimize environmental impact.
- We shall give priority to the purchase of products which contain Recycled materials rather than virgin material to minimise environmental impact.
- We shall, in our procurement, give preference to purchase from sources which are less polluting and/or use clean technology.
- We shall give preference to vendors who take the waste/ scrap materials from our project sites and recycle them to manufacture new life products.
