

GREEN SUPPLY CHAIN MANAGEMENT POLICY [GSCM]

We at Mahindra Lifespaces are committed to establish industry benchmarks in Sustainable Development. We shall ensure that the project activities carried out and the products and services provided by us from all stakeholders are environment friendly and their impact on the environment is minimal and contribute to continual improvement of supply chain.

To deliver on our commitment we shall focus on our philosophy REDUCE, REUSE, RECYCLE, RESTORE as we work on the following key areas:

- We shall encourage the Contractor, Supplier, Transporter, Service Provider and Business partners to ensure total compliance to applicable legal and other requirements which have significant impact on Health, Safety & Environment.
- We shall give priority to the purchase of locally (within 400km of the project from manufacturing plant) available materials/products of high quality to minimize environmental impact.
- We shall give preference to green certified products (including FSC, GreenPro, & other third-party certified wood-based and other products), and those which disclose health and environmental attributes with impacts of the same.
- We shall give priority to the purchase of products which are rapidly renewable, easily recyclable, and contain recycled content over virgin materials to minimise environmental impact.
- We shall, give preference to the purchase of products with low embodied carbon, low-emitting VOC materials, and from factories/brands that are committed to sustainability and/ or use cleaner technology and take appropriate measure to reduce their manufacturing footprint (resources, energy, and water).
- We shall give preference to the suppliers, contractors, vendors and manufacturers who take the responsibility of collecting the waste/scrap and packaging materials from MLDL project sites and upcycle/recycle them to remanufacture newer products (either-same material / other material / components) to promote circular economy.
- We will work with suppliers, vendors, and business partners complying with the 100% statutory/ legal requirements. We expect compliance with code of conduct and participation in self-assessment process. We are open to hearing feedback from all stakeholders to strengthen our systems and processes.
- We strive to monitor the supply chain for climate change, environmental, and social risks which will enable greening the supply chain.
